

Home made Lion fish Containment Unit

Things you'll need

Section of 4 inch PVC sewer pipe, thin wall, cut to desired length

Either a stainless or PVC 4 inch drain

4 inch cleanout adapter – thick wall

PVC Cement – 1 can and 1 PVC Male Adapter – thin wall

2 # 72 Stainless Steel hose clamps and 1 – 4 inch rubber flexible pipe cap

Assembly

Cement 4 inch drain to clean out adapter – be careful not to get cement on the threads

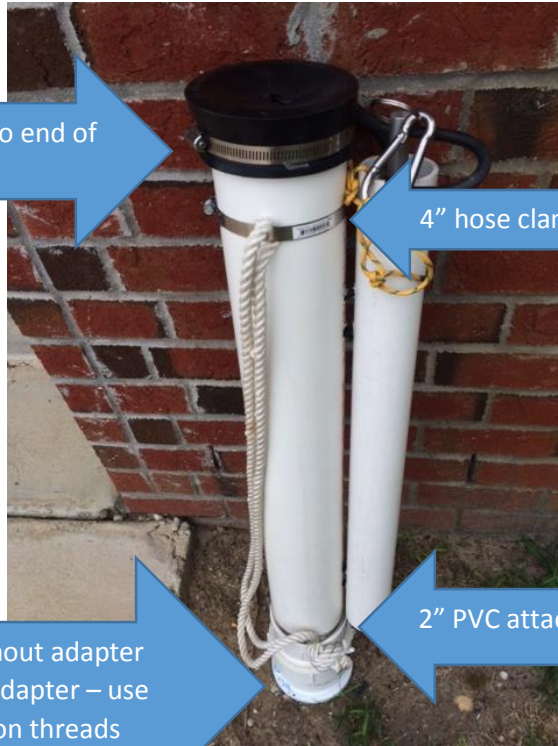

Cement Male PVC Adapter to one end of 4 inch PVC pipe

Drill a hole through the cleanout adapter/drain to allow a large screw driver in case the threads seize

Cut a hole through the 4 inch rubber cap and cut a X through cap to allow insertion of fish

4" rubber camp clamps to end of pipe

4" hose clamps attach to allow lanyard

4" drain and cleanout adapter screw onto male adapter – use silicone grease on threads

2" PVC attached with zip ties to hold lion tamer
